## WHOLESALE PRICE LIST

### SEASON 1938-1939

### November 15, 1938

#### PLEASE NOTE

All summer prices and other quotations not accepted to date are hereby cancelled.

**Prices.** All prices herein are strictly net, to the trade only and for goods at our nursery unless otherwise stated. This list means what it says both as to prices and terms and we do not deviate from it.

**Pots.** Prices of pot-grown stock do not include pots and unless otherwise instructed plants will be shipped without them. If wanted in the pots they will be charged for at cost, but may be returned and credit will be given.

**Specimens.** Prices herein are for average good plants but selected specimens will be charged for extra at actual value.

**Terms.** To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

**Quantities.** Five or more plants of one kind and size will be supplied at 10 rate; 25 or more at 100 rate; for less than 5 of one kind and size add 20% to 10 rate.

**Grading.** Plants that are wider than tall are graded by width.

**Packing.** At cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of the goods shipped. Packing free if cash comes with order.

**Shipping.** Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

**Other Stock.** This list covers stock for shipment from our San Jose Nursery. We also act as selling agents for several other growers so shall be glad to have inquiries for any material grown on the Pacific Coast but not listed herein.

**Complaints.** Must be made within 10 days after buyer receives the goods.

This firm is a member of

CALIFORNIA ASSOCIATION OF NURSERYMEN  
PACIFIC COAST ASSOCIATION OF NURSERYMEN  
CENTRAL CALIFORNIA NURSERYMEN'S ASSOCIATION  
CALIFORNIA HORTICULTURAL SOCIETY  
AMERICAN HORTICULTURAL SOCIETY  
ROYAL HORTICULTURAL SOCIETY (of England)

# New Items

After several years of importing uncommon plants and seed from all over the world we don't think we are exaggerating when we say that this list includes the

## GREATEST ASSORTMENT OF NEW AND RARE TREES AND SHRUBS

offered to the nursery trade in this country.

We have literally hundreds of new things coming along to be offered in the future.

IT WILL PAY YOU TO STUDY OUR LISTS CLOSELY EVERY YEAR!

Your attention is particularly called to the following items:

VIBURNUM BURKWOODI .....	page 19
LABURNUM VOSSI .....	" 23
NEW FLOWERING QUINCES ....	" 25
GRAFTED MAGNOLIAS .....	" 26
NEW LILACS .....	" 27
TREE ROSES .....	" 32

Laburnum vossi

## "Garden Aristocrats 1939"

This is the title of a descriptive booklet that we get out annually in January. It contains considerably more descriptive material than this list and also includes quite a number of very new things of which the present supply is too small to be included in a wholesale list.

In January we will mail a copy of this booklet to every nurseryman in Washington, Oregon, and California whose name is on our mailing list. We shall be glad, upon request, to send a copy to any address in the world.

## Lining Out Stock

For your convenience we have assembled this material at the end of this list. Much of it is scarce.

## Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so we have shown how every item was propagated using the following abbreviations:

B—budded	G—grafted
C—cuttings	S—seedlings
A. M. R. H. S.—Given an Award of Merit by Royal Horticultural Society of England	

# Conifers

Unless otherwise stated all plants in this section will be balled at prices quoted.

NOTE: A large portion of our conifers are grafted on seedling roots which gives them a far better root system than when grown from cuttings.

For "growing on" sizes see end of price list.

4 in. pot 6 to 8 in. C.....	.25	.20

# BROAD LEAVED EVERGREENS

	10 rate	100 rate
<b>BERBERIS corallina compacta (new)</b> A very beautiful new Barberry of dwarf compact growth, with small neat glossy leaves. It smothers itself with a profusion of yellow flowers. Excellent for rock gardens.		
4 in. pot 4 to 6 in. C.....	.40	.35
<b>gracilis (new)</b> Similar to B. Corallina compacta but of stronger growth though only a small shrub. The slender branches are long and arching.		
4 in. pot 4 to 6 in. C.....	.35	.30
<b>julianae (new), WINTERGREEN BARBERRY</b>		
3 to 4 ft. G.....	1.50	
2 to 3 ft. G.....	1.20	
<b>knighti</b>		
2 to 3 ft. C & G.....	1.25	1.00
gal. can 1½ to 2 ft. C & G.....	.35	.30
gal. can 1 to 1½ ft. C & G.....	.30	.25
4 in. pot 8 to 12 in. C & G.....	.25	.20
<b>umbellata (new)</b> A new Barberry from India. Leaves are small and toothed, green above and very silvery beneath. Yellow flowers followed by red fruit.		
1½ to 2 ft. S.....	.85	
1 to 1½ ft. S.....	.75	
<b>verruculosa, WARTY BARBERRY</b>		
1 to 1½ ft. C & G.....	.75	.65
gal. can 1 to 1½ ft. C & G.....	.60	.50
<b>BORONIA elatior</b> A beautiful but little known shrub. Foliage finely cut and very fragrant. Flowers like large rosy pink heather blooms practically cover the plant for a long period.		
4 in. pot 1 to 1½ ft. C.....	.30	.25
<b>BRACHYSEMA lanceolatum (new), SWAN RIVER PEA BUSH</b> Gray leaved leguminous Australian shrub bearing red flowers. Seems to bloom throughout the year. Should stand plenty of heat.		
4 in. pot 1 to 1½ ft. C.....	.40	.35
<b>BRUNFELSIA calycina (B. floribunda)</b> gal. can 1½ to 2 ft. S.....	.85	
<b>grandiflora (B. macrantha)</b> A form of the preceding with larger leaves and flowers.		
gal. can 1 to 1½ ft. G.....	.85	.75
<b>BUDDLEIA colvillei</b> 4 in. pot 8 to 12 in. C.....	.40	.35
<b>BUPLEURUM fruticosum</b> 4 in. pot 1½ to 2 ft. S.....	.30	.25
4 in. pot 1 to 1½ ft. S.....	.25	.20
<b>CALODENDRON capense, CAPE CHESTNUT</b> 4 in. pot 1½ to 2 ft. S.....	.40	.35
<b>CALOTHAMNUS chrysantherus (new)</b> Bears yellow flowers formed somewhat like Callistemon.		
4 in. pot 1 to 1½ ft. C.....	.35	.30
<b>CAMELLIA Clarke Red (double red)</b> gal. can 1 to 1½ ft. C.....	.85	.75
<b>CANTUA buxifolia, INCA SHRUB</b> gal. can 2 to 3 ft. C.....	.40	.35
4 in. pot 1 to 1½ ft. C.....	.30	.25

<b>VIBURNUM BURKWOODI,</b>		
<b>BURKWOOD VIBURNUM</b>		

This is probably the most valuable novelty in flowering shrubs that has appeared for several years. It originated in England (where it received the A. M. R. H. S.) as the result of a cross between the well-known deciduous *Viburnum carlesi* and the little known evergreen *Viburnum utile*. The result is a vigorous growing, very hardy evergreen shrub attaining about six or seven feet in height, bearing flowers as fragrant as those of *V. carlesi* but in far larger heads up to four inches broad and containing as many as two hundred and fifty individual flowers. These are pinkish in bud, open white and appear from two weeks to a month earlier than those of *V. carlesi*. It has rich, glossy green foliage, some of which turns purplish-bronze with winter weather.

Not only fully hardy on the Pacific Coast but also in all but the very severest climates in this country as evidenced by the following:

“Horticulture” recently reported that it has survived winters in Southern Ontario.

“American Nurseryman” says it recently stood a severe winter in Painesville, Ohio.

It grows readily from cuttings but our experience is that budded or grafted plants are decidedly superior. We believe that this is sure to become one of America’s most popular shrubs.

1½ to 2 ft. G.....	.60	
1 to 1½ ft. G.....	.40	.35
<b>japonica alpina (pygmaea)</b>		
Very dwarf almost prostrate. The flowers are in various shades of orange and yellow; color varies as this form is raised from seed.		
1½ to 2 ft. wide S.....	.45	.40
1 to 1½ ft. wide S.....	.35	.30
<b>japonica alpina Naranja</b>		
Dwarf; large orange flowers.		
8 to 12 in. G.....	.40	
<b>japonica Incendie</b>		
Dwarf; red flowers.		
1 to 1½ ft. G.....	.40	.35
8 to 12 in. G.....	.35	
<b>lagenaria Double Vermilion</b>		
2 to 3 ft. G.....	.85	.75
1½ to 2 ft. G.....	.75	
<b>superba corallina, CORAL GLOW</b>		
3 to 4 ft. G.....	1.10	1.00

## GENERAL COLLECTION

A 4 to 6 ft. G.....	1.20	1.00
B 3 to 4 ft. G.....	.85	.75
C 2 to 3 ft. G.....	.60	.50
D 1½ to 2 ft. G.....	.45	.40
E 1 to 1½ ft. G.....	.35	.30

Letters after each variety indicate available sizes and prices per above schedule.

The following are varieties of Ch. lagenaria so of vigorous upright growth. Large fruit.  
 Appleblossom BCDE, pink and white.  
 atrococcinea DE, coral red.  
 Bonfire CD, bright red.  
 candida BCDE, snow white.  
 cardinalis CDE, rosy scarlet.

# DECIDUOUS SHRUBS

## CHAENOMELES (Cydonia) (continued)

Columbia CDE, creamy coral.  
 foliis rubris CD, red leaves and flowers.  
 grandiflora CDE, lemon and pink.  
 Japanese Scarlet, CDE, really deep rose.  
 kermesina semiplena DE, flesh pink to red.  
 macrocarpa CD, orange red  
 moerloosei E, rose and flesh.  
 nivalis BCDE, snow white.  
 rubra grandiflora, BLOOD RED, BCDE, deep red, large flowers, early.  
 semperflorens DE, rosy coral  
 versicolor DE, flesh and cream.

The following are varieties of Ch. superba so of only low or moderate growth. Small fruit.  
 superba atrosanguinea CD, bright orange-red.  
 superba perfecta E, creamy lemon becoming pink; dwarf; fall bloomer.  
 superba rosea DE, orange rose.  
 sp. sanguinea CDE, deep red, cupped, nearly evergreen and flowers almost continuously; classification uncertain.

## OUR NEW VARIETIES

### Crimson and Gold

Flowers somewhat cupped, as large as "Blood Red" but of much deeper color, rich velvety red with a mass of golden stamens. Belongs to Ch. superba group so plant is of moderate size. Originated here as a cross between Ch. japonica alpina "Naranja" and Ch. sp. sanguinea. Now offered for first time. We regard it very highly.

			each	10 rate
3	to 4	ft. G.....	1.75	1.50
2	to 3	ft. G.....	1.50	1.25
1½	to 2	ft. G.....	1.00	.75
1	to 1½	ft. G.....	.75	.60

### CATHAYENSIS HYBRIDS

The following group of new hybrid Flowering Quinces constitutes a new and entirely distinct class or species. They are the result of crossing Ch. cathayensis onto Ch. superba corallina. Growth is vigorous with stout branches well supplied with short laterals. Most of them bloom in extreme profusion, often giving a solid mass along the branches for as much as two feet with a diameter of six or eight inches. Flowers are large and colors brilliant. Fruit large. Some are much earlier than any other Flowering Quinces we have ever seen, and we have one of the largest collections in the U. S. for comparison. We have flowered them for the last two years and selected the following numbers for propagation out of several hundred seedlings. They are not patented and we are not reserving propagation rights, but distinctly do reserve the right to name later both the group and the individual varieties. We will greatly appreciate reports on their behavior in different parts of this country and abroad.

			each	10 rate
A 4	to 5	ft. G.....	2.75	2.50
B 3	to 4	ft. G.....	2.25	2.00
C 2	to 3	ft. G.....	1.75	1.50
D 1½	to 2	ft. G.....	1.50	1.25
E 1	to 1½	ft. G.....	1.15	1.00

Letters after variety number indicate available grades.

- #310—ABCDE. Deep rose; gorgeous color; heavy bloomer; one of the very best, midseason.  
 #314—ABCDE. Large rose-pink flowers; very free blooming. Possibly the best of the early bloomers.  
 #317—BCDE. Fine red or dark rose. Early and has second crop.  
 #319—BCDE. Gorgeous color. Deep rosy red.  
 #322—BCDE. Rose and light pink blended. Very early.  
 #326—BCDE. Rosy-scarlet; early; very free bloomer.  
 #328—ABCDE. Shell-pink—the only quince of this color so is unique. Flowers up to 1¾ inches wide. Blooms freely. Greatly admired by visitors. Easily one of the best.  
 #335—ABCDE. Buds lightly flushed lavender rose. Open flowers pure white except faint lavender on tips. Old flowers deepen to soft blush. Heavy bloomer and very fine.

### ALPINA AND SUPERBA GROUP

The following are probably not hybrids but fall into the alpina and superba groups which is to say their growth is only moderate with large flowers tending toward the orange and brick shades. Fruit small.

			each	10 rate

## NEWEST VARIETIES

The following list includes practically all of the very latest European Novelties many of which have received high awards. They have been grown from plants imported under government permit. All except Gen. Pershing and Hugo de Vries were originated by Lemoine at Nancy, France.

			each	10 rate	100 rate
B 3	to 4	ft. B.....	3.00	2.50	
C 2	to 3	ft. B.....	2.25	2.00	
D 1½	to 2	ft. B.....	2.00	1.75	
E 1	to 1½	ft. B.....	1.75	1.50	

Letter after varieties indicates sizes available.

**AMI SCHOTT**—BCDE. Double; dense panicles of broad cucullate flowers, deep cobalt blue with paler reverses; a superb novelty.

**DIPLOMATE**—BCDE. Single; huge bunches of well-shaped regular flowers, cobalt blue shaded mauve, center pale lilac, buds light purple.

**ETNA**—CDE. "Broad panicles of medium sized, regular single flowers. Late. Deep claret purple; probably the nearest approach to red."—Lemoine.

**FIRMAMENT**—CDE. Single; immense panicles of large regular flowers of a beautiful shade of sky blue, truly a gem among blue varieties.

**GEN. PERSHING**—CDE. Double; flowers of quite unusual size, broad lobes, of a rich purplish-violet with paler undersides, big purple buds, late, very showy.

**HUGO de VRIES**—DE. Single; dark purple. Flowers large in long clusters. Said to be a great improvement on Ludwig Spaeth. Excellent for forcing.

**MARECHAL FOCH**—CDE. Single; bright carmine rose becoming mauve. Flowers over an inch across. Clusters up to a foot long. Some consider this the best single Lilac to date.

**MASSENA**—CDE. "Strong upright spikes; flowers single, over one inch broad and of the deepest purple red."—Lemoine. A. M. R. H. S.

**MONUMENT**—CDE. Single; very big and compact trusses of creamy white flowers. A very showy novelty of an unusual floriferousness.

**PRODIGE**—DE. Single; this novelty carries good trusses of immense flowers, measuring fully one-and-a-half inches in breadth, of a deep purplish red.

## LILAC SPECIAL LIST

Includes scarce and slow-growing varieties. Also Species Lilacs.

A 4	to 6	ft. B.....	2.25	1.75
B 3	to 4	ft. B.....	1.50	1.25
C 2	to 3	ft. B.....	.90	.75
D 1½	to 2	ft. B.....	.75	.60
E 1	to 1½	ft. B.....	.55	.45

**CHRISTOPHER COLUMBUS**—E. Single; buds mauve, flowers pure blue. Grows slowly.

**LA PLACE**—C. Single; claret violet; clusters large and showy.

**LUCIE BALTET**—BCDE. Single; buds purplish, open pink. Said to be the nearest to pure pink. Beautiful.

**PEAU de CHAMOIS**—ABCDE. Single; buff faintly tinged lavender. Very free and dependable bloomer; mid-season or late.

**PRES. LINCOLN**—DE. Single; buds purple-lilac opening to wedgewood blue.

**SUNOL**—DE. Double, buds purple; open flowers blue-lilac. Hose-in-hose type flower with strong lilac fragrance. Excellent.

**VESUVE**—E. Single; probably darkest of all Lilacs. Slow grower.

## VARIETIES ORIGINATED HERE

These are varieties of our own raising. They are not patented but we reserve the right to name them.

#110—B. Single. Light mauve purple. Petals reflexed lengthwise. Stamens show. Clusters very broad. Rich fragrance. Long blooming period.

#112—BC. Single. Opens bluish purple, becoming blue with age. Good fragrance. Unusually free blooming. Flowers and clusters large. Mid-season.

#113—C. Buds pink, opening to pale lavender pink. Free blooming in large clusters. Mid-season. Single.

#114—C. Single. Rich purple with very dark large buds. Very fragrant. Mid-season. Compact growth. Clusters rounded at tips and borne well above leaves.

#123—CD. Single. Buds mauve opening to a beautiful lavender pink. Free bloomer. Late. No other pinks in bloom at same time. This is very fine.

# DECIDUOUS SHRUBS

## SPECIES LILACS

Prices per Special List page 27.

- S. japonica**—ABCD. Japanese Tree Lilac. Makes a tree and is latest of all to bloom, in late May and June here. Flowers are white in immense compound panicles 18-24 inches long. Blooms when other flowers scarce.
- meyeri**—D. Compact growth to about five feet. Purple to purplish lilac when expanded.
- microphylla**—BCD. Has an abundance of small fragrant pink flowers. It is unique in that it often has a second crop of bloom in October.
- oblata**—E. A compact shrub or small tree up to 12 ft. Flowers pink to purplish lilac in bud, opening to pale lilac.
- pubescens**—DE. Said to have the most pleasing fragrance of all lilacs; also earliest. Flowers in dense panicles to five inches long. pale lilac. Shrub to 6 ft.
- reflexa**—ABC. Nodding Lilac. Buds deep rose; flowers rosy pink in drooping clusters nine to twelve inches long, literally covering the bush. Shrub to 12 ft.
- sweginzowi superba**—BCD. Terminal and axillary spikes of fragrant bluish flowers. Coloring similar to Dr. Breitschneider. Shrub to 10 ft. Fragrance rich, blooms with other species Lilacs after vulgaris types gone.
- tomentella**—BCDE. Very large, loose clusters of rose-lilac flowers. Late. 10 ft.

## GENERAL COLLECTION OF LILACS

Advance sales have so nearly absorbed our entire stock that it would be misleading to give any list now. We can only accept orders for our selection of varieties, (customer's choice of colors) in 1 to 1½ ft. grade (nothing larger).

Price .....	10 rate .40	100 rate .35
<b>VIBURNUM betulifolium (new)</b>		
From Western China. Fine attractive, Birch-like foliage. Flowers in cymes about 4 inches broad followed by a heavy crop of brilliant red red berries. Grows to about 10 ft.

# Grafted Wisterias

## NEW VARIETIES

	10 rate	100 rate
<b>WISTERIA floribunda Geisha</b> Appearance unusually dainty. Both flowers and clusters are smaller than most kinds, but are charming. Color light lavender.		
1 year G.....	.75	.60
<b>floribunda longissima alba</b> Flowers pure white in clusters up to 2½ ft.		
4 year G.....	2.00	
1 year G.....	.75	
<b>floribunda Royal Purple</b> The best new Wisteria we have seen in years. Of the Japanese type and has the deepest purple flowers of all the single Wisterias, borne in well filled clusters of moderate length. Very precocious, blooming almost as young as Chinese.		
2 year G.....	.90	
1 Year G.....	.75	.60

## GENERAL COLLECTION

A 5 year G.....	2.25	2.00
B 4 year G.....	1.50	1.25
C 3 year G.....	.90	.75
D 2 year G.....	.60	.50
E 1 year G.....	.40	.35

Letters after varieties show sizes available.

**floribunda (W. multijuga) ABE**

### JAPANESE WISTERIA

All Wisterias of Japanese type are now referred to as W. floribunda instead of W. multijuga as heretofore.

**floribunda alba ABDE**

### WHITE JAPANESE WISTERIA

**floribunda carnea (flesh pink) AE**

**floribunda Issai AE**

Very fine variety which we imported from Japan in 1931. Probably a hybrid between W. floribunda and W. sinensis. Light purple. Both profuse and precocious.

**floribunda Kyushaku E**

**floribunda longissima ABDE**

### EXTRA LONG JAPANESE WISTERIA

Introduced by us about ten years ago and now widely known. Clusters on well established plants attain 4 feet and even more.

**floribunda rosea DE**

### PINK JAPANESE WISTERIA

This variety is genuinely pink. Beware of inferior strains. All our propagation is from our own blooming plants which bear beautiful pink flowers in long clusters.

**floribunda violacea plena AE**

### DOUBLE VIOLET WISTERIA

**sinensis, CHINESE WISTERIA CDE**

**sinensis alba DE**

### WHITE CHINESE WISTERIA

**sinensis nankingensis C**

### MINIATURE WISTERIA

**venusta alba BE**

### SILKY WHITE WISTERIA

Flowers very large, chalk white, fragrant. Clusters short and broad.

**venusta violacea DE**

The purple counterpart of W. venusta alba. Much like Chinese in color but has light and dark petals giving it a slightly mottled appearance. A tremendous bloomer with large flowers on long stems.

**sp. Mrs. McCullagh ABD**

A rare and beautiful variety of uncertain species. Flowers large purple in compact clusters. The wood is very short-jointed making this very desirable where space is limited.

# Standard Wisterias

Advance sales have been so heavy that our stock is practically exhausted for this season.

# Stock To Grow On

Everything offered below is high grade material which we have grown primarily for our own use but of which we have more than we need for our own planting.

QUANTITY RATES. Not less than 5 of a kind and size will be booked. 25 or more of one kind and size will take 100 rates; less take 10 rates.

PACKING. Free in lieu of cash discount if remittance in full accompanies order; otherwise at cost.

ABBREVIATIONS: G means grafted; C cuttings; S seedlings; 2½p etc., means of course from 2½ inch etc., pots.

# Roses

We grow bush and climbing roses extensively in a fine assortment of varieties and can also supply nearly all of the patented kinds. List is too long to be included here but will be sent on request. After orders already booked have been filled we will issue a revised list which will be mailed to all customers on the Pacific Coast and upon request to Eastern Nurserymen.

## Standard or Tree Roses

**QUALITY:** The very best. Stems 40 inches tall with well branched and well developed heads.

**STEMS:** Most varieties on either LaGrifferaie or I. X. L. The former is hardier, the latter is smoother in appearance.

**VARIETIES:** An excellent assortment but limited to those that do well in tree form and make good heads.

 Talisman, golden yellow and copper red.

## Bird's IMPROVED NEPONSET Flower Pots

We are agents for Bird & Son's famous Neponset Paper Pots. The green pots, now greatly improved, are used for growing and the red (same as we use ourselves) for shipping.

Prices on green pots are at factory in Mass. Freight via Panama Canal is slight.

Prices on red pots include freight to any point in U. S. A. if ordered for shipment direct from factory. Otherwise f. o. b. San Jose. All prices are for unbroken case lots.

Size	Quantity per case	Weight per case	Price per 1000	
			Green	Red
2 inch	1000	14 lbs.	\$ 4.50	\$ 2.75
2½ inch	1000	22 lbs.	5.00	3.00
3 inch	1000	28 lbs.	5.90	3.85
4 inch	500	26 lbs.	9.25	6.00
5 inch	500	44 lbs.	14.00	8.25
6 inch	500	62 lbs.	18.25	11.00

Special rates will be quoted on request for unusually large quantities.
